OF SANTA BARBARA

FALL 2026

NEWSLETTER

20 years of helping patients reconnect with life

It's hard to believe we are entering the final months of 2026! This year has been especially fulfilling, as we celebrate 20 years in practice! With a monumental milestone such as this, we'd like to say how grateful all of us at Hearing Services of Santa Barbara are for your continued trust in our expertise. Patient care is at the heart of what we do, and the relationships we've built throughout the years mean the world to us.

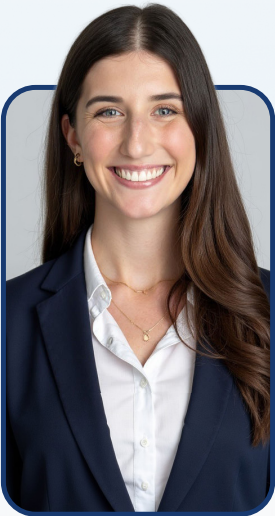

Please read below for some recent clinic updates, and look inside this newsletter for information on our upcoming Oticon hearing aid event.

CONGRATULATIONS to our very own Dr. Mandy Pimentel!

Please join us in congratulating Mandy on her graduation and completion of her doctorate in audiology from San Jose State University! As many of you know, Mandy is a lifelong resident of Santa Barbara County who joined us last year for her program externship. During her time at Hearing Services of Santa Barbara, she has expanded her knowledge of the industry and gained ample expertise in treating patients, while under the guidance of our doctors of audiology.

We are thrilled she has decided to join us full-time as an audiologist! Congratulations, Mandy!

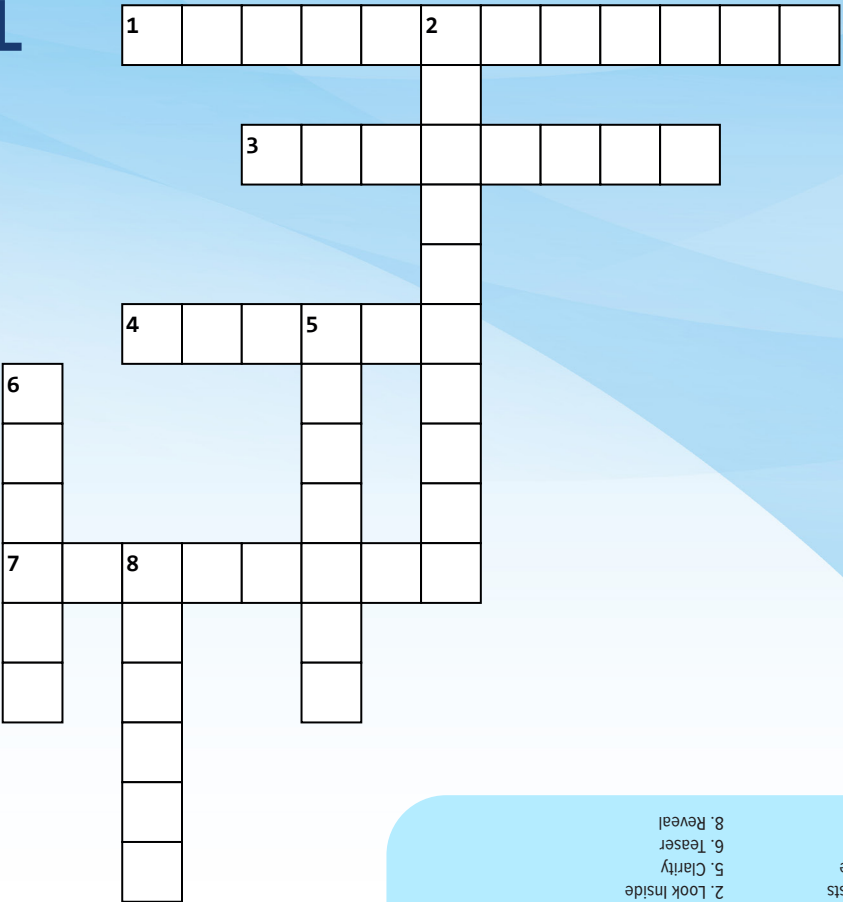

WELCOME, Jenna Snyder, Student Doctor of Audiology!

If you have visited us recently, you might have recognized a new face in the clinic! Jenna was born and raised in Los Angeles and is earning her doctorate in audiology from Gallaudet University in Washington, D.C. Growing up alongside family and friends with hearing loss, learning sign language and working with the Deaf community shaped Jenna's belief that everyone deserves access to communication. Recognizing the impact hearing loss can have on communication and one's quality of life is what ultimately inspired her career in audiology.

INTRODUCING the Oticon Reveal™

Imagine hearing feeling natural again—
effortless and comfortable

That's exactly what the brand-new **Oticon Reveal** hearing aid is designed to help you experience. Since your brain does the real work of hearing, Oticon Reveal is built with Oticon's unique BrainHearing™ technology. In fact, it supports the brain by giving you both clear speech and the sounds around you that bring conversation to life.

IT ALSO OFFERS:

- **A discreet, comfortable design** with all-day rechargeable power*
- **Dual AI technology** to provide you with crystal-clear speech and access to sounds around you
- **A richer, more natural listening experience**, so life feels more complete
- **Less effort to hear and understand**, so you have more energy for what you love
- **Simple, seamless connectivity** to your favorite devices

Together, these features help you feel more present, more confident and more connected. When hearing feels natural, the best version of you comes through.

*Expected use time for rechargeable battery depends on use pattern, active feature set, hearing loss, sound environment, battery age and use of wireless accessories. Oticon and Reveal are trademarks of Oticon A/S, registered in the United States and other jurisdictions. All rights reserved.

Learning what's new, so you can hear best!

Our team has been busy traveling to some of the recent manufacturer product launch events in order to learn more about the latest in hearing device technology. Pictured here, one of our audiologists Kathleen accompanied by our doctor of audiology student, Jenna, at the OticonNext event in Chula Vista, CA. Together, they learned first-hand about the devices' dual AI technology and how it can best benefit users. Karlee and our Operations Manager, Eliza, also flew to attend the launch of the ReSound Sensia™. Be sure to ask your audiologist about these new hearing aids!

You're Invited

Mark your calendars—we are excited to host a month-long
Oticon hearing aid event to showcase the brand-new Reveal!

September 29
Solvang

September 30
Santa Barbara

Kimberly Pearson

Don't miss this event—it's your chance to demo the Oticon Reveal hearing aids in person and discover first-hand how much they can elevate your listening experience. Kimberly Pearson, Oticon Account Manager, will be on-site both days to demonstrate this technology and help answer product questions.

Call us at (805) 869-1277 to schedule an appointment for this special event! Limited spots are available!

Patient Appreciation Week— In Celebration of 20 Years!

SEPTEMBER 21—SEPTEMBER 25

20 years of stories.
20 years of connections.
20 years of helping people hear what matters most.

AND WE HAVE YOU TO THANK!

As a way to say “thank you” for choosing us as your hearing health provider, please come and join us for a week dedicated to our fantastic patients! We will have treats available and fun gifts to take home. This will also be a great time to get to know Christina, our Audiology Assistant, who works closely alongside our audiologists as an extension of their care, helping ensure every patient receives the attention, support and follow through they need.

Call us to schedule a quick appointment during patient appreciation week! Christina is available for hearing aid clean and checks and general device troubleshooting.
